## Profile Summary

---

Aspiring Full Stack Developer with a strong foundation in **Java**, **Spring Boot**, **HTML**, **CSS**, **JavaScript**, and **MySQL**. Successfully completed a comprehensive Java Full Stack Development course, gaining hands-on experience in building dynamic web applications, **RESTful APIs**, and database integration. Skilled in both **front-end** and **back-end** technologies, with a keen interest in developing scalable and user-friendly solutions. Eager to contribute to a growth-oriented organization and apply practical skills in a professional environment.

## Technical Skills

---

**Frontend:** HTML, CSS, JavaScript, and Bootstrap

**Backend:** Java, Python basic, Spring Boot and MySQL.

## Projects

---

### Student Management System - ([Java](#))

- The system allows **adding, updating, deleting, and searching** student records by roll number or name
- It uses input validation to ensure **correct data types** for fields like roll number, age, and grade.
- Utilizes file or database storage with a **user-friendly** interface.

### Supermarket Billing System ([Java](#))

- The Supermarket Billing System is a console-based Java application for managing sales.
- It allows users to input product names, quantities, and prices for multiple items.
- The system calculates totals and prints a detailed bill for the customer. It provides a basic but functional approach to billing without database or GUI integration.

### Bike Selling Web Application CRM-based (IndexedDB, JavaScript, HTML, CSS )

- Built a CRM-style web app to manage bike listings, sales, and customer enquiries with status tracking.
- Enabled features like adding, updating, deleting, and marking bikes as sold with local storage using IndexedDB.
- Designed a responsive UI using HTML, CSS, JavaScript, and IndexedDB for offline-first support.

## Education

---

### NXTWave Disruptive Technologies

Industry Ready Certification in **Java Full Stack Development**
